General Debate
Third Preparatory Committee for
the 2005 Review Conference of the Parties
to the Treaty on the Non-Proliferation of
Nuclear Weapons
28 April 2004

STATEMENT
by
Ms. Tamara Rastovac, Third Secretary at the
Permanent Mission of Serbia and Montenegro
to the United Nations

Mr. Chairman,

At the outset, I would like to congratulate you on your election as Chairman of
this important meeting. We are confident that with your diplomatic skills and leadership
we shall have fruitful discussions and a successful outcome. You can count on full
cooperation of my delegation in achieving this goal.

Serbia and Montenegro fully aligns itself with the statement made earlier by the
representative of Ireland on behalf of the European Union. I would like to take this
opportunity to present the views and highlight some of the activities undertaken by my
Government at the national level in connection with the Treaty on the Non-Proliferation
of Nuclear Weapons (NPT).

Mr. Chairman,

Today, we are more than ever aware of the threat posed by the weapons of
mass destruction and their proliferation. The risk that these types of weapons and
means of their delivery be acquired by terrorists and terrorist organizations necessitates

Permanent Mission of Serbia and Montenegro to the United Nations

global action and broadest cooperation within the international community. In that context, our attention should be focused on the strengthening and improving the existing international instruments which provide a good framework to efficiently deal with this global threat.

For its part, Serbia and Montenegro strongly supports all efforts aimed at eliminating WMD, particularly nuclear weapons. In that connection, as a State Party to the NPT, Serbia and Montenegro attaches great importance to the Treaty as one of the most important international instruments in the field of nuclear disarmament and non-proliferation. We strongly support the universality of, and full compliance with, the NPT. We also uphold the consensus decisions reached at the 1995 and 2000 NPT Review Conferences.

Serbia and Montenegro attaches great importance to the activities of the International Atomic Energy Agency and its safeguards regime to ensure nuclear non-proliferation, which should be further strengthened. At the start of 2002, the Safeguards Agreement with the Agency was renewed enabling further strengthening of our cooperation with the Agency. In December 2003, it signed the Framework Agreement on Technical Cooperation with the IAEA. Serbia and Montenegro has reaffirmed its commitment to follow the guidelines contained in the Code of Conduct adopted by the Council of Governors of the Agency in September 2003 and confirmed by its General Conference.

We support the efforts to provide the Agency with all necessary funds so that it may fulfill its mandate. For its part, my country duly honors its obligations towards the IAEA budget. In view of the importance to strengthen nuclear safety, we consider that the Agency's funding for the implementation of the programs for nuclear safety promotion measures should be increased.

Furthermore, Serbia and Montenegro supports the Agency's efforts to strengthen the international cooperation in the field of management and transport of nuclear waste. In that respect, we supported the trilateral initiative by the Governments of the United States and the Russian Federation and the IAEA whereby 80 per cent of the enriched fresh nuclear fuel from Serbia and Montenegro has been safely transported back to the Russian Federation, as a country of origin, for enrichment-level reduction.

Since my and many other countries are facing certain problems in the field of management and disposal of nuclear waste, we consider that States should be assisted by adequate funds in order to find long-term solutions to this issue. We would like to take this opportunity to thank the US Government for the financial support granted to us in this respect.

My country is fully committed to the use of nuclear energy for peaceful purposes only. However, it should be coupled with a strict control regime to prevent its misuse.
Mr. Chairman,

In order to achieve complete disarmament and non-proliferation framework, much more needs to be done. We support the early entry into force of the Comprehensive Test Ban Treaty (CTBT) as well as the conclusion of a fissile material cut-off treaty (FMCT). The Parliament of Serbia and Montenegro adopted the Law on the CTBT and the ratification instrument should be deposited with the Secretary-General soon. Furthermore, in November 2000, we acceded to the Hague Code of Conduct against Ballistic Missiles Proliferation. We receive it as a very important part of the entire non-proliferation regime. In February 2004, the Declaration was adopted whereby my country committed itself on a voluntary basis to honor the provisions contained in the documents of the Missile Technology Control Regime, namely those included in the Equipment, Software and Technology Annex and Guidelines for Sensitive Missile Relevant Transfers.

Mr. Chairman,

In conclusion, I am joining the other speakers in the general debate who expressed their hopes for the successful outcome of the third session of the Preparatory Committee. We hope that the decisions to be made will lay solid groundwork and provide positive input for the 2005 NPT Review Conference.
