Madam President, I would like express my appreciation to your leadership in this Conference.

My delegation is of the opinion that the following elements should be included in the preamble of the Treaty:

1. **Must contain clear objective toward total elimination of nuclear weapons**, namely:
   a. Concrete steps to dismantle all existing nuclear.
   b. Permanent and irrevocable conversion of fissile materials obtained from the dismantlement process to non-weapon grade standard.
   c. Universal de-legitimation of the concept of nuclear deterrence by making clear that such concept to be in fundamental contradiction to principles of humanity and international peace and security embodied in the Charter of the United Nations.
   d. Ensuring the finality and perpetual maintenance of the total elimination of nuclear weapons through the implementation of the provisions of the NPT.

2. Make reference to the **responsibility of State Parties to take action** to realize that objectives with regard to the abovementioned steps in a symmetrical proportion to each nation's level of development.

3. Contain element of the **impact of nuclear weapons, including its humanitarian consequences** This Treaty should also incorporate aspirations transpired during the conferences on Humanitarian Impact of Nuclear Weapons (HINW) in Oslo (2013), Nayarit (2014), and Vienna (2014).

4. Reference **relevant United Nations resolutions and the relevant existing Treaties** as this Treaty is built upon other existing Treaties. This Treaty should also reflects a continuation of spirit and principles embodied in First Special Session of the United Nations General Assembly devoted to Disarmament (SSOD-1) in 1978 as one of the important milestones in nuclear disarmament.

5. Stress the **complementary nature of the Treaty with the NPT**. This Treaty will fill the obvious void which has hitherto been haunting the NPT namely the imbalance between its Disarmament and Non-Proliferation Pillars.

6. **The relevance of the Treaty with Treaties that establish Nuclear Weapons Free Zones**.

I thank you
