Ray Acheson is the Director of Reaching Critical Will, a project of the Women's International League for Peace and Freedom (WILPF). She is responsible for coordinating, writing for, and editing Reaching Critical Will’s publications, such as the NPT News in Review and First Committee Monitor, as well as research projects such as Beyond arms control: challenges and choices for nuclear disarmament and Costs, risks, and myths of nuclear power. Previously, Ray worked with the Institute for Defense and Disarmament Studies tracking the manufacture and trade of conventional weapon systems and writing for the organization’s flagship journal, the Arms Control Reporter. She has an Honours BA from the University of Toronto in Peace and Conflict Studies and is pursuing an MA in Politics at the New School for Social Research.

John Ainslie is coordinator of the Scottish Campaign for Nuclear Disarmament. In addition to supporting the anti-nuclear weapons movement in Scotland he has carried out research into the history of the British nuclear weapons programme, the Polaris and Trident systems, and defence nuclear safety issues over the past 20 years.

Merav Datan is an international lawyer and a former adjunct professor at Rutgers Law School. She is a board member of the Lawyers Committee on Nuclear Policy and former director of the Women's International League for Peace and Freedom's UN Office in New York. She has also worked as a consultant for the United Nations Department for Disarmament Affairs (WMD Branch) and as Middle East Political Advisor for Greenpeace International.

Hans M. Kristensen is Director of the Nuclear Information Project at the Federation of American Scientists in Washington, D.C., where he researches and writes about the status and operations of nuclear forces of the nine nuclear weapon states. He is a frequent advisor to the news media on the status of nuclear forces and policy. Kristensen is co-author of the bi-monthly Nuclear Notebook column in the Bulletin of the Atomic Scientists and the World Nuclear Forces overview in the SIPRI Yearbook, both of which are some the most widely used reference material on the status of the world’s nuclear arsenals. He is the author of "Reviewing Nuclear Guidance: Putting Obama’s Words Into Action," Arms Control Today, November 2011, and From Counterforce to Minimal Deterrence: A New Nuclear Policy on the Path Toward Eliminating Nuclear Weapons (FAS/NRDC, April 2009). Prior to his current position, Kristensen was a consultant to the Nuclear Program at the Natural Resources Defense Council in Washington, D.C. (2003–2005), and Program Officer at the Nautilus Institute in Berkeley, CA (1998–2002).

Andrew Lichterman is a lawyer and policy analyst for the Oakland, California-based Western States Legal Foundation. He has represented peace and environmental activists in settings ranging from arrests in mass direct actions to environmental challenges to military projects, and also has written extensively about disarmament and disarmament movements in the San Francisco Bay area. As a lawyer, he has represented peace and environmental activists in a variety of settings, and also taught law at alternative law schools for many years. In recent years his work has focused on the purposes and impacts of US nuclear and other strategic weapons programs, including their effect on global disarmament efforts, and on the relationship between nuclear technologies, militarism, and the global economy. He also writes about the politics of disarmament efforts and the relationship between disarmament work and other social movements. He is a member of the boards of the Western States Legal Foundation and of the Los Alamos Study Group, an Albuquerque, New Mexico-based peace organization.
Zia Mian directs the Project on Peace and Security in South Asia at Princeton University’s Program on Science and Global Security and teaches at Princeton's Woodrow Wilson School of Public and International Affairs. His research and teaching focus on nuclear weapons and nuclear energy policy, especially in Pakistan and India. He is co-editor of Science & Global Security, the international technical journal of arms control, nonproliferation, and disarmament and co-deputy chair of the International Panel on Fissile Materials (IPFM). He is the editor of several books, most recently Bridging Partition: People’s Initiative for Peace between India and Pakistan, and has also worked on two documentary films for the Eqbal Ahmad Foundation, Crossing the Lines: Kashmir, Pakistan, India and Pakistan and India under the Nuclear Shadow. In addition to his research and writing, he is active with a number of civil society groups working for nuclear disarmament, peace, and justice.

Pavel Podvig is an independent analyst based in Geneva, where he runs his research project, “Russian Nuclear Forces”. He is also a Senior Research Fellow at the United Nations Institute for Disarmament Research. Pavel Podvig started his work on arms control at the Center for Arms Control Studies at the Moscow Institute of Physics and Technology (MIPT), which was the first independent research organization in Russia dedicated to analysis of technical issues of disarmament and non-proliferation. Pavel Podvig led the Center for Arms Control Studies project that produced the book, Russian Strategic Nuclear Forces (MIT Press, 2001). In recognition of his work in Russia, the American Physical Society awarded Podvig the Leo Szilard Lectureship Award of 2008 (with Anatoli Diakov). Podvig worked with the Program on Science and Global Security at Princeton University, the Security Studies Program at MIT, and the Center for International Security and Cooperation at Stanford University. His current research focuses on the Russian strategic forces and nuclear weapons complex, as well as technical and political aspects of nuclear non-proliferation, disarmament, missile defence, and US-Russian arms control process. Podvig is a member of the International Panel on Fissile Materials. He has a physics degree from MIPT and PhD in political science from the Moscow Institute of World Economy and International Relations.

M. V. Ramana, a physicist by training, is currently appointed jointly with the Nuclear Futures Laboratory and the Program on Science and Global Security, both at Princeton University, and works on the future of nuclear energy in the context of climate change and nuclear disarmament. He is the author of The Power of Promise: Examining Nuclear Energy in India, to be published later this year by Penguin. He is co-editor of Prisoners of the Nuclear Dream (New Delhi: Orient Longman, 2003) and author of Bombing Bombay? Effects of Nuclear Weapons and a Case Study of a Hypothetical Explosion (Cambridge, MA: International Physicians for the Prevention of Nuclear War, 1999). He is on the National Coordinating Committee of the Coalition for Nuclear Disarmament and Peace (India), a member of the International Panel on Fissile Materials, and on the Science and Security Board of the Bulletin of the Atomic Scientists.

Tim Wright is the Australian director of the International Campaign to Abolish Nuclear Weapons, which advocates for a global ban on the use and possession of nuclear weapons by all states. His most recent publications include Don’t Bank on the Bomb: A Global Report on the Financing of Nuclear Weapons Producers (2012) and Towards a Treaty Banning Nuclear Weapons: A Guide to Government Positions on a Nuclear Weapons Convention (2012). He has an honours degree in law and a degree in international studies from the University of Melbourne.

Hui Zhang is a Senior Research Associate at the Project on Managing the Atom in the Belfer Center for Science and International Affairs at Harvard University’s John F. Kennedy School of Government. Dr. Zhang is leading a research initiative on China’s nuclear policies for the Project on Managing the Atom in the Kennedy School of Government. His researches include verification techniques of nuclear arms control, the control of fissile material, nuclear terrorism, China’s nuclear policy, nuclear safeguards and non-proliferation, and policies of nuclear fuel cycle and reprocessing.
